

ACC Limited, a Holcim India member company, announced the successful commissioning of a 1.6 MTPA Grinding Unit (GU) in Tikaria, Uttar Pradesh. The new capacity will add 1.6 MTPA of cement to Tikaria GU's current capacity of 2.31 MTPA, bringing the total capacity to 3.91 MTPA.

In January 2021, the foundation stone of Tikaria GU was placed with the goal of significantly contributing to servicing the growing market, strengthening ACC's position in the centre region, and adding value to its business. The new factory will produce low-carbon cement products that are environmentally beneficial.

The cooperation of the State Government and local governments aided in the Project's flawless execution and successful start-up.
