

With the connectivity of a 135 MW portfolio of projects in the state of Maharashtra and the purchase of six operational projects from Rays Power Infra in the states of Telangana and Karnataka, Enfinity Global, a pioneer in renewable energy, has increased its solar capacity in India by 205 MW.

“This capacity addition marks an important milestone on Enfinity Global’s growth strategy in India.

We will continue to strengthen our market presence by developing a hybrid renewable portfolio of

about three GW as part of our current pipeline and continue to acquire operational assets across

segments. We are also expanding into other sustainability areas such as water management, sustainable mobility, hydrogen generation and circular economy” says Sandip Agarwal, Enfinity

Global CEO for India.

During the first half of 2022, the company has built and interconnected 135 MW in ten different

solar power plants in the state of Maharashtra.
