

Tata Power reported installing public charging stations at a hotel in Malda, West Bengal, bringing the state's total number of such EV facilities to over 150.

It has two EV charging stations with capacities of 30 kw and 7.4 kw installed at the hotel, which is situated on the Kolkata-Siliguri highway 5 km from Malda railway station.

All travellers or tourists coming to the hotel can make use of the Tata Power EZ Charge mobile app to find the nearest charging stations on the go. More than 1 lakh people in India have already downloaded the app, the company said.

Tata Power currently has a network of 4,000 plus charging points, over 40,000 home chargers (for private usage), 250 plus electric bus charging points, and a live EV charging network in over 550 cities across India to build a sustainable EV mobility infrastructure, it added.
