

EXZOD India will set up a manufacturing plant in Hyderabad to serve its clients in Southern India.

EXZOD has three other manufacturing units in Punjab, Maharashtra and Haryana equipped with state-of-the-art automatic pallet manufacturing machines.

“This would make us a dependable company for buying pallets for both large brands and 4PL warehousing players in the country. We are the only organised pallet manufacturing company in India which has automated pallet manufacturing and so far delivered more than 7,00,000+ pallets for our clients,” said Nitin Kalla, Founder & Managing Director, EXZOD India. The vision for a new plant is to advance its business expansion goals, mainly owing to strong demand for pallets due to growth, improvement in supply chain management, automation in both materials handling at production and user end and even at storage level for industries like FMCG, consumer durables, logistics, industrials, retail, petrochemicals and automotive and 4 PL logistic players.
