

Gujarat aims to become the world's centre for green hydrogen production in the next 10-12 years, according to state Industries Minister Balwantsinh Rajput.

On Monday, Rajput addressed a plenary session on "Gujarat's G20 Connect" as part of the Business 20 India Inception Meeting, saying that Gujarat, as a driving force, will make a significant contribution to India's economic development.

"By 2026-27, Gujarat aims to be a \$500 billion economy and by 2030-32, a \$1 trillion economy," he said.

Gujarat aims to especially focus on farsighted policies and green production processes for the new generation in alignment with the global agenda, Rajput said.
