

JSW Steel, which is run by Sajjan Jindal, plans to reach a 50 million tonne (mt) capacity by 2030 to keep pace with the growth of the nation.

Jindal stated that **JSW Steel**'s present capacity is 27 million, which may rise to 50 mt by 2030 through greenfield and brownfield options, during a session sponsored by the Indian Chamber of Commerce (ICC) in Kolkata.

The country's goal of tripling crude steel capacity to 300 mt in the following 9-10 years is aligned with Jindal's growth goals. He also thinks that in ten years, the Indian economy might grow by a factor of three.

"If India has to grow, then we have to grow in a very big way," he told members of the Chamber.
