

A 204 MW wind energy project has been awarded to Suzlon by Serentica Renewables, a developer of renewable energy solutions.

According to a corporate release, Serentica Renewables, a decarbonization platform that aims to speed up the energy transition for energy-intensive sectors, “has placed a sizably large order for Suzlon Group’s 3 MW series of wind turbines.”

The cost of the project, however, was kept a secret by the corporation.

For Serentica’s upcoming 204 MW wind power project in Koppal in Karnataka, Suzlon will install 68 wind turbine generators (WTGs) with a Hybrid Lattice Tubular (HLT) tower with a rated capacity of 3 MW each.

“This order from industrial decarbonisation player, Serentica Renewables is a testament of India Inc’s commitment to our nation’s net-zero ambitions,” Girish Tanti, Vice Chairman, Suzlon Group, said in the statement.
