

In Uttarakhand, [Luminous Power Technologies](#) intends to construct the nation's first solar panel manufacturing factory based on green energy. According to a business release, the new manufacturing facility in Rudrapur is anticipated to be completely operational by the end of this year.

According to the statement, the cutting-edge facility will be furnished with the most recent technology to design and create premium solar panels for use in both residential and commercial applications.

Once it is up and running, the facility, which covers 4.5 lakh square feet (10 acres), would make it possible to produce solar panels with a range of power outputs from 40W to 600W, with a capacity of 500 MW annually that may be increased to 1 GW.
