

Okinawa Autotech announced that it has formed a joint venture with Tacita, an Italian electric and performance bike company, to produce futuristic scooters and motorbikes as well as powertrain for local and foreign markets.

Okinawa Autotech stated the Joint Venture (JV) firm would be situated in India and begin manufacturing in 2023.

A scooter and a high-end performance motorbike will be part of the 2023 line, which will be outfitted with the greatest connection systems on the market thanks to Okinawa technology.

Tacita makes electric superbikes with zero-emission engines, as well as leisure and competitive off-road bikes. With BMS, Tacita creates its own powertrain, controller, motor, and battery pack (Battery Management System).
