

In the Vijayanagara district of Karnataka, Kudligi's renewable energy (RE) project by Renew Sandur Green Energy (RSGEPL) has been put into operation. The RE project, which includes a 9.9 MW wind farm and a 33 MW solar farm, will lessen reliance on fossil fuels and improve the environment.

A joint equity-based agreement was struck by Renew Energy Global PLC, the parent company of Renew Green Energy Solutions (ReNew), and Sandur Manganese & Iron Ores (SMIORE) to build a power plant that uses solar and wind energy to produce sustainable electricity. ReNew company and SMIORE are committed to a sustainable future, and this project is expected to contribute significantly to the region's RE capacity.

Gurugram-based ReNew has a renewable asset base of 13.7 GW, including projects under development and in the pipeline.
