

Ishver Dholakiya, managing director of Gujarat-based Goldi Solar said that the company is now investing more than Rs 5,000 crore to increase its module manufacturing capacity to 6 GW.

Dholakiya, who is also the founder of the company, stated that the current total module manufacturing capacity of the company is 2.5 GW.

When asked about the company's growth plans, he replied, "We are in the process of investing over Rs 5,000 crore as part of our expansion plans to increase module manufacturing from 2.5 GW to 6 GW."

The renewable energy business expansion will be channelled into auxiliary production, including aluminium frames, junction boxes, backsheet, etc, he said.

The investment will be made by the year 2025, he said, adding, his company also aims to recruit over 4,500 people across various functions, which will increase its workforce to over
