

[Stalwart Agronomics](#) is gearing up to establish a chemical products manufacturing unit in Kanjampudur, Vadugapatti post, Sankagiri, Salem, Tamil Nadu. The project aims to manufacture a range of chemical products that cater to the needs of the agricultural industry. The products to be manufactured include Potassium Humate 40%, Protein Hydrolyzed Liquid, Fulvic 30% Powder, Seaweed 10% Powder, and Secondary Nutrients Granular. These products will be produced at a rate of 40 MT/M for Potassium Humate 40% and Protein Hydrolyzed Liquid, 20 MT/A for Fulvic 30% Powder, 40 MT/M for Seaweed 10% Powder, and 95 MT/M for Secondary Nutrients Granular. The establishment of the new chemical products manufacturing unit is poised to bring about significant benefits for the local community. The project is expected to create employment opportunities for the local workforce, especially for those with a background in chemical engineering and manufacturing. Additionally, the establishment of the new unit is expected to bring about a positive impact on the agricultural industry in the region by providing farmers with access to high-quality chemical products that cater to the needs of their crops. With the company having received consent from the state pollution control authorities to establish the project, Stalwart Agronomics is poised to commence construction of the new manufacturing unit and begin operations soon.
