

Tata Motors is aiming to boost up production of electric vehicles as demand continues to outstrip manufacturing activity by a large margin.

The Mumbai-based manufacturer, which dominated the Indian passenger electric vehicle market last fiscal year, has received an average of 5,500-6,000 orders for its EV line in the previous two months.

In the domestic market, the company offers three electric vehicles: Nexon EV, Tigor EV, and XPRES-T.

It also just announced a coupe-style SUV that would be available in the next two years.

Tata Motors Managing Director Passenger Vehicle and Electric Vehicles Shailesh Chandra noted that huge demand for its EV range has led to a backlog of customer orders.
