

Tata Power Solar Systems Limited (Tata Power Solar), a wholly-owned subsidiary of Tata Power and one of India's major integrated solar companies, commissions a 160MW AC solar project in Jetstar, Rajasthan. This installation utilises around 6,75,000 monocrystalline PV modules and will generate 387 MUs of electricity per year.

The Jetstar project was finished in just 15 months, demonstrating Tata Power Solar's superior project execution skills. The project engineers had to work in difficult weather circumstances, which included moving workers and machinery to the project site.

The Jetstar project is one of Rajasthan's largest solar projects.
