

In order to maximise the effectiveness, accessibility, and dependability of its extensive city gas network, which includes many distant terminals spread across dispersed places in the states of Punjab, Uttar Pradesh, Bihar, and Madhya Pradesh, Think Gas has partnered with ABB.

ABB has created a solution that will integrate, monitor, and manage daily operations throughout the company, automating workflows to assist operators maximise uptime and increase safety. This solution leverages the SCADA Advantage system that ABB has put in the cloud.

The ABB Ability Genix Industrial Analytics and AI suite, which will combine various sources of real-time data from THINK Gas's operations across its network, is at the centre of the digital architecture used by Think Gas.
